React Hook Form
Axios
Git

SUMMARY

Meticulous self-taught front-end developer focusing on building scalable and responsive interfaces for functional web applications. Excellent team player ready to apply passion to a talented team with demonstrated excellence in developing quality edge-cutting solutions.

EXPERIENCE

Frontend Developer
Freelance — Nov. 2022 to Present

Work with other developers to deliver solutions on different projects which include e-commerce websites, landing pages, blog sites, etc.

- Implement several websites, and web applications from concept to deployment.
- Convert product designs into high-quality code and responsive interfaces for a great user experience.
- Perform backend integrations and implement responsive design techniques.
- Collaborate with team members to implement new feature developments on products.

Implementation Specialist
Sendme.ng — Jun. 2022 to Jan. 2023

Sendme.ng (YC W22) is a startup backed by Y Combinators and Voltron Capital, aiming to decentralize animal protein distribution from production to consumers using artificial intelligence and data analytics.

- Performed software testing, debugging, and supported bug resolution on both mobile and web apps.
- Collaborated with clients to understand their needs and requirements, and provided recommendations for design and functionality.
- Presented findings which helped redefine in-app supply-chain processes.
- Managed inventory on the software systems which helped increase customer satisfaction by 70%.
- Installed and educated on software systems and all necessary components.
