SUMMARY

Meticulous self-taught front-end developer focusing on building scalable and responsive interfaces for functional web applications. Excellent team player ready to apply passion to a talented engineering team with demonstrated excellence in developing quality edge-cutting solutions.

EXPERIENCE

Frontend Developer
Freelance   Nov 2022 – Present

• Implement several websites, and web applications: e-commerce and landing pages from concept to deployment.
• Implement responsive design techniques to ensure websites were optimized for mobile devices.
• Convert product designs into high-quality code and responsive interfaces for a great user experience.
• Collaborate with product team members to implement new feature developments.

Implementation Specialist
Sendme.ng   Jun 2022 – Jan 2023

Sendme.ng (YC W22) is a startup backed by Y combinators and Voltron Capital, with the goal of decentralizing the distribution of animal protein from production through to consumers using artificial intelligence and data analytics.

• Collaborated with clients to understand their needs and requirements, and provided recommendations for design and functionality.
• Tested software, debugged issues, and supported bug resolution on apps and software.
• Managed inventory on the software systems which helped increase customer satisfaction by 70%.
• Installed and educated on software systems and all necessary components.
